Webinar Series

**Feb 10, 2021**

**8:00 AM TO 9:00 AM**

## Research Manitoba

**Sean McKay**

Interim Chief Executive Officer (CEO)

Research Manitoba promotes, supports, and coordinates the funding of research excellence and innovation in health, natural and social sciences, engineering and the humanities in Manitoba. Over the last year, a new strategic plan has been rolled out with a focus on strengthening the economy in the advanced manufacturing, infrastructure, transportation, ICT and bioscience/health sectors. An Innovation Proof of Concept (IPoC) program has been launched for industry led projects targeting product and process development that lead to commercialization and/or disruptive technologies; for example, use of smart robots and artificial intelligence to manufacture aerospace parts. The purpose of this presentation is to provide an overview of Research Manitoba and its programs that could benefit Manitoba Aerospace members.
