

Launch Your Career

Magellan Aerospace has an exciting career opportunity for a full-time permanent **Manufacturing Engineering (ME) Planner - Entry Level or Intermediate** at our manufacturing hub in Winnipeg, Manitoba.

Magellan Aerospace is a global, integrated aerospace company that provides complex assemblies and systems solutions to aircraft and engine manufacturers, and defence and space agencies worldwide. At Magellan we have over 80 years of collective knowledge and experience in the aerospace industry, and believe one truth: People create value.

Employees are our greatest resource in working towards a successful future, and together we build professional relationships that thrive. We know that personal development is fundamental to the success of every individual and invest in our employees by providing excellent career progression opportunities. When you are part of Magellan, you are part of the team!

Entry Level / Intermediate Manufacturing Engineering (ME) Planner

Primary Responsibilities:

- Introducing new components and technologies into production in support of cost effective, high quality products;
- Developing and optimizing manufacturing processes, and preparing detailed process instructions to define the manufacturing processes;
- Working with internal and external contacts on matters concerning product definition, tooling, inspection, scheduling, corrective actions, and continuous improvements;
- Creating and maintaining product definition, tooling, process certification, and shop order routings;
- Investigating and dispositioning non-conformances;
- Providing shop floor liaison for resolution of technical matters.

Position Requirements / Qualifications Include:

- Post-secondary education in Mechanical Engineering Technology;
- Minimum of 3 to 6 years of related work experience in a manufacturing environment (for Intermediate level);
- Experience in sheet metal detail manufacturing, machining components, pneumatic and hydraulic hardware/systems, composite manufacturing, heat treating and forming operations;
- Experience in the use of Microsoft Office applications;
- Experience using CINCOM would be considered an asset.
