

Magellan Aerospace has an exciting opportunity for a **Machinist** at our manufacturing hub in Winnipeg, MB. This position will be full time, permanent and unionized. The successful candidate must be available to work shift work when scheduled.

Magellan Aerospace is a global, integrated aerospace company that provides complex assemblies and systems solutions to aircraft and engine manufacturers, and defence and space agencies worldwide. At Magellan we have over 80 years of collective knowledge and experience in the aerospace industry, and believe one truth: People create value.

Employees are our greatest resource in working towards a successful future, and together we build professional relationships that thrive. We know that personal development is fundamental to the success of every individual and invest in our employees by providing excellent career progression opportunities. When you are part of Magellan, you are part of the team!

Machinist

Primary Responsibilities:

With proper instruction and training, the **Machinist** will be responsible for setting up and operating in accordance with all applicable work instructions for all levels of work, any of the following machines: C.N.C. and conventional milling, turning, grinding, E.D.M., and Laser. The Machinist will perform tasks on the equipment as defined on the total preventative maintenance (TPM) check list. The company will ensure that the TPM checklist assignments do not conflict with the Trades Qualification Act or applicable Codes or Legislation.

Position Requirements / Qualifications Include:

- Minimum five (5) years of related work experience in manual or CNC setup and machining.
- Ability to correctly interpret blue prints.
- Ability to read, write and communicate in English.
- Ability to follow verbal and written instructions.
- Ability to work within specified safety requirements (ie. PPE).
- Shift work may be required. Must be available to work shift work when scheduled.

Preference will be given to those candidates with the following:

- Red Seal Machinist or Canadian Council for Aviation & Aerospace (CCAA) accreditation.
- Diploma in RRC CNC Machining and Advanced Technology or equivalent.
- Ability to interpret and apply GD&T requirements.
