

The Director of Quality leads a team of quality professionals with oversight of all aspects of the quality and regulatory group for PADM Medical in Canada and the United States including Quality Assurance, Quality Control, quality standard certification, and regulatory submissions and approvals.

**Responsibilities include:**

- Ensuring that quality systems are in place and properly functioning to deliver product and service in conformance to customer requirements and regulations;
- Maintaining and improving the company's Quality Management System (QMS);
- Developing and implementing product and process testing and measuring programs;
- Supporting the product development process;
- Implementing and maintaining effective quality control inspection and testing processes;
- Oversight of QC and QA laboratory facilities;
- Quality documentation and information systems and processes;
- Performing supplier qualification and certification;
- Participating in manufacturing risk and design reviews;
- Leading internal and external quality audits, corrective, and preventive actions;
- Leading Risk Management and business continuity initiatives;
- Ensuring the maintenance of Quality System registrations such as ISO13485, CE Mark, ISO9001;

**Qualifications:**

- Post-Secondary education in Mechanical Engineering or Science;
- ASQ Certified Quality Engineer designation (preferred);
- Lean or Lean Sigma Green or Blackbelt an asset;
- 8-10 Years in Quality Assurance and Quality Control;
- Developing and implementation of a Quality Management System;
- Demonstrated experience with the preparation of regulatory submissions to, and inspections with, agencies such as Health Canada, Agriculture Canada, USDA or FDA;
- 5 Years of management experience at the manager or director level in a regulated industry (food, medical devices, pharma);
- Fundamental understanding of quality systems and their development, documentation, and implementation to domestic and international standards or requirements;
- Ability to plan, control, and assure product and process quality across a spectrum of business environments;
- Thorough understanding of problem-solving and quality improvement tools and techniques;
- Deep knowledge of all regulation rules and standards relevant to the industry;
- Excellent people and communication skills;
- Experience leading and coaching teams of professionals;

**What we offer:**

- Competitive salary;
- Company paid comprehensive Health and Dental Benefits;
- Life Insurance, AD&D and LTD coverage;
- Pension plan with 3% company match;
- Free Parking.

**How to apply:**
